

City of Rockingham - Safety Bay Ward - Councillor

COOPER, Glen

Married with 4 children and 15 years experience as a business development manager, I believe in the fundamental values of family, community & safety.

I bring a solution based approach with my focus on three key areas;

Community Service Programs such as access to financial management programs to help the high rate of mortgage pressures within the city, as well tackling local issues such as homelessness, substance abuse & mental health

Environmental issues such as the preservation of our coastline and the questions surrounding future developments.

And Rockingham as a tourist destination.

As a member of council I will have a down to earth approach to do my part to shape the City of Rockingham into a safe coastal community that looks after its residents, maintains best environmental practices, and promote the amazing diversity of this great city as a tourist destination.

All while taking into account sustainable budget management.
