**SUBURB:** Baldivis  
**PAW Code No.** B574, B575  
**Map H10**

**PAW location:**
Connects Ukich Place to Friedlander Road.

**Design characteristics:**

PAW reserve approx. 6m wide and 315m long. Dog-leg alignment. Undulating. Padlocked gate halfway.

**Condition:**
Fair.

**Level of casual surveillance:**
Good, due to open nature of fencing and proximity of adjacent residences.
**Fencing attributes:**
Post and wire.

**Paving:**
Limestone/dirt track.

**Landscaping/vegetation:**
-

**Lighting:**
None.

**Level of usage:**
Used as a fire access track.

**Presence of services:**
-

**2007 Bikeplan recommendations:**
-

**History:** (i.e., reported social difficulties such as vandalism, crime, nuisance and reduced privacy & amenity)
-

**Additional comments:**
This PAW functions as a fire access track. The padlock on the gate across the track halfway along its length is apparently accessible to City of Rockingham fire authorities.

Although not operating as a “pedestrian accessway”, this PAW is essential for firefighting vehicle access and must be retained.

SUBURB: Baldivis  PAW Code No. B580  Map H6

PAW location:

Connects Archer Close to Loxley Place.

Design characteristics:

PAW reserve approx. 6m wide and 78m long. Straight, undulating.

Condition:

Very good.

Level of casual surveillance:

Good, due to low post & wire fencing and proximity of adjacent residences.

Fencing attributes:

Low post and wire.

Paving:

Red/brown asphalt with mountable kerbs both sides. Approx. 3m wide.

Landscaping/vegetation:

Planted and reticulated margins.

Lighting:

Street light at both ends.
Level of usage:
Used by locals (on foot and in vehicles), and probably also as a fire access track.

Presence of services:
-

2007 Bikeplan recommendations:
-

History: (i.e., reported social difficulties such as vandalism, crime, nuisance and reduced privacy & amenity)
-

Additional comments:
This PAW functions as a general access and (probably) as a fire access track.

It is in very good condition and well-maintained.

Although not operating solely as a “pedestrian accessway”, this PAW is essential for firefighting vehicle access and must be retained.

SUBURB: Baldivis

PAW Code No. B582

PAW location:

Connects Treetop Way to bushland behind.

Design characteristics:

PAW reserve approx. 6m wide and 70m long. Straight, steeply undulating. Locked gate at northern end, with narrow access retained adjacent to gate for pedestrians (see photo on right).

Condition:

Fair.

Level of casual surveillance:

Fair, due to low post & wire fencing and proximity of adjacent residences.

Fencing attributes:

Low post and wire.

Paving:

Limestone track.

Landscaping/vegetation:

Some bushes overhanging and intruding onto track.

Lighting:

None.
Level of usage:

Used by locals, and probably also as a fire access track.

Presence of services:

- 

2007 Bikeplan recommendations:

- 

History: (i.e., reported social difficulties such as vandalism, crime, nuisance and reduced privacy & amenity)

- 

Additional comments:

This PAW functions as pedestrian access and (probably) as a fire access track. It connects to a firebreak or fire access track running east-west along the northern boundary of the subdivision.

Although not operating solely as a “pedestrian accessway”, this PAW is essential for firefighting vehicle access and must be retained.
